

JUDE MIRAC

Data Analyst | Operational Performance and Risk Analytics

Hamilton, NJ | (609) 456-9598 | judemirac20@gmail.com

judemirac.github.io | github.com/JudeMirac

linkedin.com/in/judeson-mirac

PROFESSIONAL SUMMARY

Data analyst with experience improving operational reporting, incident data quality, training tracking, and database accuracy. Uses SQL, Python, Excel, and Tableau to validate records, define performance measures, analyze trends, and communicate findings. Portfolio spans transportation analytics, workplace safety analysis, and fraud risk modeling.

TECHNICAL SKILLS

SQL, Microsoft Access, SQLite, Python, pandas, NumPy, scikit-learn, Excel, Tableau Public, Amazon QuickSight, GitHub, Google Sheets

Data cleaning and validation, KPI reporting, exploratory data analysis, dashboard development, classification modeling, root-cause analysis, stakeholder communication

PROFESSIONAL EXPERIENCE

Amazon | Health and Safety Analyst

Swedesboro and Burlington, NJ | May 2025 - Present

- Reduced the Incident Data Quality Defect Rate from 40% to 12% by reviewing injury documentation, validating case details, and improving record consistency.
- Improved CAST campaign and huddle refresher completion metrics by 40% through roster review, completion tracking, and coordination with Operations and Learning.
- Tracked 138 Dragonfly safety observations from 56 users and achieved 100% on-time closure; monitored feedback quality and coached managers on response follow-up.
- Built site-level trackers for inspections, overdue actions, and environmental compliance measures, giving Operations and Environmental partners a consolidated view of outstanding work.
- Translated daily incident, near-miss, audit, and training data into leadership updates; partnered with Operations, HR, and Learning to validate information and resolve reporting gaps.

Hudson Community Enterprise | Data Entry Specialist and Database Support

Jersey City, NJ | January 2023 - May 2024

- Converted source documents into standardized digital records for healthcare, government, legal, and engineering accounts, supporting reporting and administrative workflows.
- Identified and corrected missing, duplicate, and inconsistent information before database updates, improving the reliability of records used by internal teams.
- Maintained confidential client records and consistent data-entry workflows while meeting accuracy requirements and independently reviewing detailed documentation.

RELEVANT PROJECTS

Portfolio: judemirac.github.io

Transportation Analytics | SQL, Microsoft Access, Tableau

- Connected six operational tables covering trips, contractors, drivers, vehicles, maintenance, and compliance to analyze service reliability and fleet readiness.
- Defined on-time performance using completed trips with valid pickup times and a -5 to +15 minute window; validated missing assignments and reconciled contractor totals.
- Published an interactive Tableau dashboard and portfolio case study presenting service performance, contractor comparisons, and data-quality measures.

Safety Risk Analysis | SQL, SQLite, Python, pandas, Tableau

- Built a layered pipeline to load, standardize, join, and summarize incident and exposure data, with reusable views for weekly trends and category distributions.
- Analyzed 203 incidents across 52 weeks and 1.65 million exposure hours; calculated an overall rate of 24.58 incidents per 200,000 hours in the demonstration dataset.
- Published Tableau views of weekly counts, incident rates, root causes, severity codes, and contributing factors, keeping separate source populations distinct.

Fraud Risk Modeling | Python, pandas, scikit-learn, Tableau

- Analyzed 5,000 transactions, engineered features, and compared Logistic Regression and Random Forest models using class weighting and ROC-AUC evaluation.
- Converted ranked model scores into ALLOW, REVIEW, and BLOCK tiers and examined transaction volumes and observed fraud rates within each tier.
- Built and embedded a Tableau dashboard comparing merchant categories, domestic and international transactions, and model decision tiers.

EDUCATION

Saint Peter's University | Jersey City, NJ

Master of Business Administration, Business Analytics | Expected June 2027

Bachelor of Science, Business Management | 2024

CERTIFICATIONS AND COMPLETED COURSES

OSHA 30-Hour Training | Completed

IBM / Coursera

Python Project for Data Science | August 2025

Databases and SQL for Data Science with Python | July 2025

Python for Data Science, AI & Development | June 2025

Excel Basics for Data Analysis | June 2025

Data Visualization and Dashboards with Excel and Cognos | June 2025

Introduction to Data Analytics | June 2025
